

Table of Contents

Chapter I - Introduction

1	Background.....	5
2	Objectives	8
3	Main steps of the REEPRO project	10
3.1	Training material (training kits) development.....	10
3.2	Training performance.....	12
3.3	Community Showcases	14
4	Benefit from the REEPRO Project	17
5	Partners	18
5.1	European Partners.....	18
5.2	Lao Partners	18
5.3	Cambodian Partners.....	19
6	Introduction of the course participants.....	19

Chapter II - Basics

1	Basics of Renewable Energy.....	27
1.1	Definitions	27
1.2	Scope and Applicability.....	28
1.3	Environmental Impact	29
2	Sources for Renewable Energy	31
2.1	Wind Energy	31
2.2	Sunlight (PV and Solar Thermal)	35
2.3	Biomass	47
2.4	Hydropower	53
3	Fundamentals of Electricity and Construction	59
3.1	Basic Electrical Applications.....	59
4	Assessment of Possible Sources	68
4.1	Basic Data for an Assessment.....	68
4.2	Renewable Potential Assessment	69
5	References	73

Chapter III - Power transmission and storage

1	Introduction	81
2	Power transmission and distribution	81
2.1	Selection of distribution network configuration	81
2.2	Balance of phases	85
3	Electrical safety.....	87
3.1	Nature of electrical shock and fire	87
3.2	Protection against possible electrical risk.....	90
4	Generator control panel.....	94

4.1	Measurement tools.....	95
4.2	Security components.....	97
5	Storage.....	98
5.1	Various types of energy storage.....	98
5.2	Battery.....	99
6	References.....	108

Chapter IV - Photovoltaic

1	Solar PV systems types	117
1.1	Stand Alone Systems.....	117
1.2	Grid-Connected Systems.....	119
1.3	Hybrid Grid Systems	121
2	PV System Components	122
2.1	PV Modules.....	123
2.2	Inverters	139
2.3	Cables	141
2.4	Installation material	141
2.5	Switchgear and fuses.....	142
2.6	Charge controllers.....	142
2.7	Batteries / Accumulators	142
3	Experience with Solar - Home Systems.....	149
3.1	Non-technical Aspects Relevant for System Sizing and Design Costs	149
3.2	Technical Aspects System Losses.....	151
3.3	Sizing of the PV Module.....	153
3.4	Module Support Structure	154
3.5	Charge Regulator (controller).....	154
3.6	Battery.....	155
3.7	Lamps, Ballasts, and Fixtures	158
3.8	Wiring, Switches, and Outlets	158
3.9	Inverters	159
4	PV stand-alone System planning	159
4.1	Site survey.....	160
4.2	Planning and designing Solar Home Systems	162
4.3	Battery charging stations.....	169
4.4	Water pumping.....	173
4.5	Combined Solar Home-Battery Charging system	177
5	PV Solar Home System commissioning and maintenance	178
5.1	Quality control issues of Solar Home system.....	178
5.2	Solar Home system hardware description:.....	178
5.3	PV Module Installation.....	179
5.4	Circuit Protection and Charge Controls.....	180
5.5	Solar Home System Component Specifications.....	180
6	References.....	196

Chapter V - Solar Thermal

1	Solar thermal system types and applications	203
1.1	Solar thermal systems for hot water and heating	203
1.2	Solar thermal systems for swimming pool	204
1.3	Solar cooling systems	205
1.4	Solar drying systems	208
1.5	Solar cooking	210
2	Solar water heating systems	215
2.1	Components of solar water heating	215
2.2	Possible configuration of solar water heating system	221
3	Solar thermal system dimensioning, installation, commissioning and maintenance	223
3.1	Dimensioning of system components	223
3.2	Costs and yields analysis of a solar water heating system	227
3.3	Installation	228
3.4	Commissioning of a solar water system	230
3.5	Maintenance	232
4	References	233

Chapter VI - Case Studies

1	PV Case Study Ban Mane	239
1.1	Input data	239
2	Exercise	241
3	Complete example project design for the case study location	241
3.1	First general discussion of different possibilities	241
3.2	SWOT analysis to identify the best solution	242
3.3	Detailed design of the selected solution	242
3.4	Cost calculation of the selected solution	242
3.5	Financing options	243
3.6	Gant chart for project implementation	243

Chapter VII - Case Studies

1	PV Case Study – Kampong Thom	249
1.1	Input data	249
1.2	Solar radiation in Kampong Thom	251
2	Exercise	251
2.1	First general discussion of different possibilities	251
2.2	SWOT analysis to identify the best solution	252
2.3	Detailed design of the selected solution	253
2.4	Cost calculation of the selected solution	255
2.5	Financing options	257
2.6	Gant chart for project implementation	258

Chapter VIII - leXsolar Experiments (for small set)

1	The leXsolar-Experiment kit	263
1.1	List of devices contained in leXsolar-experiment (small set).....	263
1.2	Working with leXsolar-experiment kit	264
2	Experiment 1: Series and parallel connection of solar cells	267
2.1	Task	267
2.2	Required devices.....	267
2.3	Arrangement.....	267
2.4	Execution.....	268
2.5	Measured values	268
2.6	Diagrams	268
2.7	Evaluation.....	269
3	Experiment 2: Dependence of the power on the surface of the solar cell	269
3.1	Task	269
3.2	Required devices.....	269
3.3	Arrangement.....	270
3.4	Execution.....	270
3.5	Measured values	270
3.6	Diagram.....	271
3.7	Evaluation.....	272
4	Experiment 3: The dependence of the power on the angle of incidence of the light.....	273
4.1	Task	273
4.2	Required devices.....	273
4.3	Arrangement.....	273
4.4	Execution.....	274
4.5	Measured values	274
4.6	Diagrams	275
4.7	Evaluation.....	275
5	Experiment 4: Diode's character of the solar cell - Reverse and forward direction with darkening and illumination	276
5.1	Task	276
5.2	Required devices.....	276
5.3	Arrangement.....	276
5.4	Execution.....	276
5.5	Measured values	277
5.6	Evaluation.....	277
6	Experiment 5: Shadowing of series-connected solar cells	278
6.1	Task	278
6.2	Required devices.....	278
6.3	Arrangement.....	278
6.4	Execution.....	278
6.5	Measured values	279
6.6	Evaluation.....	279
7	Experiment 6: Shadowing of parallel-connected solar cells	280

7.1	Task	280
7.2	Required devices	280
7.3	Arrangement	280
7.4	Execution	280
7.5	Measured values	281
7.6	Evaluation	281
8	Experiment 7: Solar cell as transmittance measuring devices	281
8.1	Task	281
8.2	Required devices	281
8.3	Arrangement	282
8.4	Execution	282
8.5	Measured values	282
8.6	Evaluation	282
9	Reference	282

Chapter IX - Practical works with PV training tool kit

1	Objective and Toolkit description	287
2	Possible practical exercises with toolkit	288
2.1	Checking actual Module parameters	288
2.2	Modules connection	289
2.3	Effect of Module orientation and slop	292
2.4	Effects of Modules shading	293
2.5	Solar home system	294
3	Reference	296
