

Table of Contents

Chapter I - Introduction

1	Background.....	5
2	Objectives	8
3	Main steps of the REEPRO project	10
3.1	Training material (training kits) development.....	10
3.2	Training performance.....	12
3.3	Community Showcases	14
4	Benefit from the REEPRO Project	17
5	Partners	18
5.1	European Partners.....	18
5.2	Lao Partners	18
5.3	Cambodian Partners.....	19
6	Introduction of the course participants.....	19

Chapter II - Basics

1	Basics of Renewable Energy.....	27
1.1	Definitions	27
1.2	Scope and Applicability.....	28
1.3	Environmental Impact	29
2	Sources for Renewable Energy	31
2.1	Wind Energy	31
2.2	Sunlight (PV and Solar Thermal)	35
2.3	Biomass	47
2.4	Hydropower	53
3	Fundamentals of Electricity and Construction	59
3.1	Basic Electrical Applications.....	59
4	Assessment of Possible Sources	68
4.1	Basic Data for an Assessment.....	68
4.2	Renewable Potential Assessment	69
5	References	73

Chapter III - Power transmission and storage

1	Introduction	81
2	Power transmission and distribution	81
2.1	Selection of distribution network configuration	81
2.2	Balance of phases	85
3	Electrical safety.....	87
3.1	Nature of electrical shock and fire	87
3.2	Protection against possible electrical risk.....	90
4	Generator control panel.....	94

4.1	Measurement tools.....	95
4.2	Security components.....	97
5	Storage.....	98
5.1	Various types of energy storage.....	98
5.2	Battery.....	99
6	References.....	108

Chapter IV - Level 1 Training Kit Module 2.6

1	Types of Biofuel, Basics and Definitions.....	113
1.1	General.....	113
1.2	Definitions of contents and usage.....	115
1.3	Application Possibilities.....	117
2	Sources for Biofuel Generation.....	118
2.1	Biodiesel Feedstock.....	118
2.2	Feedstock for Bioethanol.....	124
2.3	Feedstock for Second Generation Biofuels.....	126
3	Fundamentals of Biofuel Production.....	127
3.1	Biodiesel Production.....	127
3.2	Bioethanol Production.....	131
3.3	Cellulosic Ethanol Production.....	133
4	Biofuel Utilization.....	138
4.1	Applications for Transport.....	138
4.2	Applications for Electrical Energy Generation.....	145
4.3	Applications for Cooking and Heating.....	147
5	References.....	149

Chapter V - Level 1 Training Kit

1	Microbial Basics.....	157
2	Anaerobic Degradation.....	158
3	Processes and Parameters.....	160
3.1	Degradability of Organic Matter.....	160
3.2	Influencing Factors.....	162
3.3	Classification of AD Processes.....	166
3.4	Biomass Retention.....	169
3.5	Mass Balance and Energy Yields.....	169
4	Input and Output Materials and their Use.....	170
4.1	Livestock manure.....	170
4.2	Organic waste.....	172
4.3	Substrate Transport.....	172
4.4	Storage of Substrates.....	174
4.5	Use of Digestate.....	174
4.6	Use of Biogas.....	177
5	Components of Domestic Biogas Systems.....	180
5.1	Inlet tank.....	180

5.2	Inlet Pipe	181
5.3	Digester (Digestion Chamber)	181
5.4	Gas Holder (Storage Chamber)	182
5.5	Outlet Tank (Displacement Chamber)	184
5.6	Slurry Pits	186
6	Biogas Applications	187
6.1	Use of Gas Stove for Cooking	187
6.2	Use of Gas Lamp for lighting	188
6.3	Operation of an Engine	188
7	Dimensions and Specific Characteristics of Domestic Plants	188
8	Example Calculation of Domestic Biogas Plants	189
8.1	Sizing the Plant	189
8.2	Calculating the daily gas production (G)	190
8.3	Establishing the plan parameters	190
8.4	Size the gasholder	190
8.5	Simple Calculations	191
9	References	191

Chapter VI - Gasification

1	Types of Gasifiers, Basics and Definitions	199
1.1	Fixed bed gasifiers	199
1.2	Fluidised bed gasifiers	203
1.3	Stove design of a down-draught gasifier	205
2	Sources for gasifier power generation	217
2.1	Charcoal	217
2.2	Wood sources	217
2.3	Agricultural sources	219
3	Fundamentals of gasification production	220
3.1	Technical basics and prerequisites	220
3.2	Thermochemical reactions	226
3.3	Utilization of Producer or Wood gas	227
3.4	Rocket stoves	228
4	Electrical power generation	230
4.1	Large scale applications (500 kW and above)	231
4.2	Medium scale applications (30 -500 kW)	231
4.3	Small-scale applications (7 - 30 kW)	231
4.4	Micro scale applications (1 - 7 kW)	232
4.5	Vehicle propulsion	237
5	References	240

Chapter VII - Rocket Stove

1	Introduction to Institutional Rocket Stove	245
2	Needed Materials and Expense	246
3	Brick Preparation	246

3.1	Size of Light Weight Bricks.....	246
3.2	Stove modification	247
3.3	Proportion of Brick Materials	248
4	Prepare Surrounding Cans.....	249
5	Assembly.....	249
6	Advantage of Rocket Stove.....	250
7	Reference.....	251
